

AIR FILTRATION KIT FOR PLASMA CUTTING MACHINES

Hypertherm air filtration kits come with a 1-micron filter to protect Hypertherm Powermax plasma cutting systems from contaminated air and an auto-drain moisture separator that filters water and moisture from air lines.

Features

- Easy Installation: mount directly on the Powermax or wall-mount using the custom bracket
- Savings: potentially save hundreds, if not thousands, over the Powermax system's life
- Operational Improvements: consistent, clean air supply translates to peak performance
