

## DISCOVERY 200S WECO WELDING MACHINE

The DISCOVERY 200S is a compact and extremely robust power source suitable for the toughest applications. With 200A and high thermal cycle, electrodes up to 5.00 mm thick can be perfectly welded.

This power source is designed for those who normally and professionally weld with covered electrodes. Indeed, the user can set certain parameters such as the HOTSTART control for better ignition of the coated electrode, as well as the ARCFORCE control to prevent the machine from stopping during welding. In addition, the machine for TIG direct current welding has a pulse frequency control and adjustable base current. In addition, the WECO procedures during the design phases, the checks and the final inspection guarantee maximum reliability of the machine.

Technology: Inverter / Type: MMA

WEC K00100270000A - A2960

Weight	10 kg
	MMA
	TIG DC
MMA setting range	5-200 A
Open circuit voltage	61 V
Duty cycle 60%	170 A
Duty cycle 100%	130 A
Welding current max.	200 A
Power kVA max	6,7 kVA
Voltage	3x400 V
Mains fuse	16 A
IP protection class	IP23S
Insulation class	H
Standards	EN 60974-1/-10
Length	400 mm
Width	160 mm
Height	260 mm
Family	Discovery
