

LENGTH MEASURING SYSTEMS

TIGERSTOP SAWGEAR 3 AUTOMATIC LENGTH STOP

TIG PRO3 - M11786

Length	3000 mm
--------	---------

LENGTH MEASURING SYSTEMS

Time saving

- With the automated system of the SawGear you increase your productivity considerably
- The machine is easy to use and positions your material constantly and precisely
- This quickly saves you 30% more time, because you have to walk back and forth a lot less to set up the machine.
- The measuring work and setting the stop are now done automatically

Precise work

- With the SawGear you always process your material exactly to the right size
- With a repeat accuracy of 0.2 mm you are assured of dimensionally stable work, without exception
- In addition, the SawGear with a memory of 10 lists is extremely suitable for performing repeat jobs quickly and efficiently

Easy to use mounting on existing machine tools

- The SawGear is so quick and easy to install that you can get started within minutes
- The start g can be installed on the left or right
- You can opt for a matching smooth table or roller table, but the SawGear is also easy to place on your existing table

What can you do with the SawGear?

- The SawGear has various functions and can be used in the wood, aluminum, metal and plastic industries

Functionalities

- Memory for 10 lists with 10 positions each
- Zero point compensation
- Pinch protection
- Anti-theft system
- Increment function
- Software for moldings
- Shortcuts for miter work
- 5 languages (English, Spanish, German, Dutch and French)

Te mount on almost any (processing) machine

- Such as your sawing, drilling or punching machine

Included as standard

- The arm supplied as standard makes it possible to position up to the zero point

Technical specifications

- Total length: 3.0m
- Working length: 2.4m

Expandable with

- Tables (both smooth and with rollers)
- Mounting bracket set
